

Automotive industry Arch frame press 75 tons

Characteristics :

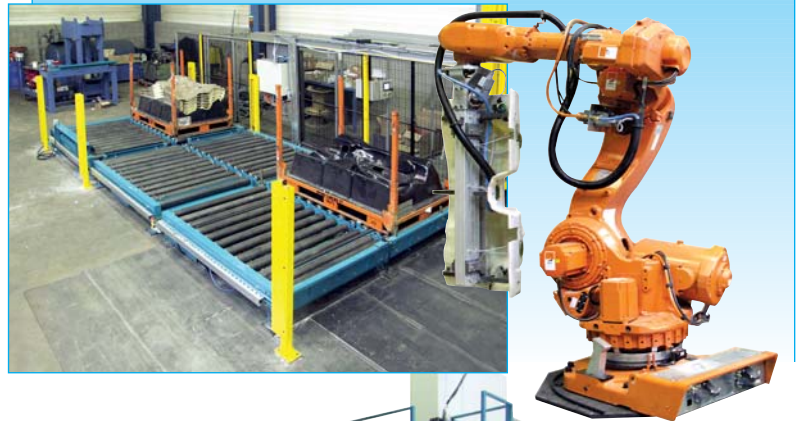

- Force : 75 tons
- Stroke : 1200 mm
- Maximum passage
- Tables 2110 x 1350 mm
- Rate line : 120 pieces/hour

Equipment :

- A carpet of transport motorized of the parts
- A carpet of evacuation motorized of waste
- A carpet of coating motorized and sliding to bring the parts under the press
- A robot for the evacuation of the parts under the press
- A system of palletization of the full and empty containers
- An automate of supervision with touch panel

Operations :

- Automatic alimentation
- Coating of the part under press
- Conformation in the tool
- Cut out primary
- Piloting of cutting tools
- Evacuation and deposits by robot in container
- Management of the containers by carroussel of exit

Design and manufacturing according to specifications
