

STRAIGHTENING AND FORMING PRESS

C-FRAME OR ARCH PRESSES

Operations:

are adapted for custom work or mass production to use in aircraft, energy, agribusiness, automotive, heavy industry ...

Characteristics:

Designed for a large range of products :

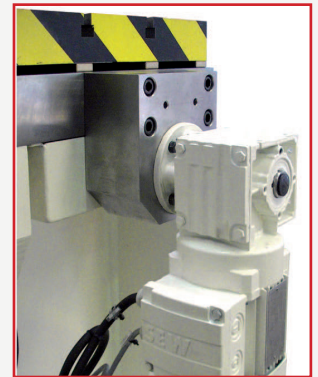

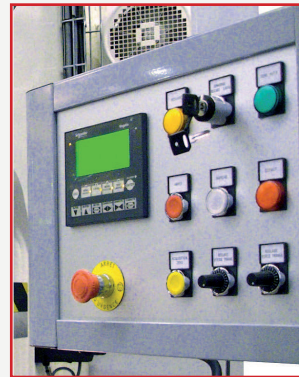

Tubs, profiles, metal sheet, shape parts, specific materials (aeronautic aluminium, stainless steel, titanium, spring steel).

Control systems available :

- cylinder's movement thanks to hydraulic or analogical lever
- mechanical or analogical pressure adjustment
- variable speeds
- work stroke and safety stroke setting-up

Accessories and options :

- Straightening/Forming/control tools,
- Controls and measurements, applied pressures, product manufacturing quality
- Recording, saving and edition of processing data (traceability)
